

Do Older Investors Make Better Investment Decisions?

George M. Korniotis and Alok Kumar

Review of Economics and Statistics, 93 (1), 244-265, 2011.

BROKERAGE DATA

We use *proprietary brokerage data* in this paper. The programs available for the replication of our results are listed below. The original brokerage data can be obtained from Professor Terrance Odean, University of California at Berkeley (odean@haas.berkeley.edu) by signing a non-disclosure agreement.

MATLAB PROGRAMS

If you need help in interpreting these programs, please contact Alok Kumar, University of Miami (akumar@miami.edu). Additional code that may be needed to run these programs can be obtained from this source as well.
